

Dental Implant Training Program Including hands -on surgery with your patients

2009
29th Year

Over 700 doctors/staff have completed hands-on surgery modules
Externs have placed thousands of implants

Program Modules

301 How to do the SIMPLE procedures of implant placement and restoration.

Review of the basic Anatomy, Physiology and Pathology, Implant Design, Surgical Template, Bone Morphology, Diagnosis and Treatment Planning, Radiography, Pharmacology, Patient selection, Documentation, Understand the basics of anatomy pertaining to implant dentistry, Explains the basics of implant placement in mandibular and maxillary bone, Tissue Management of simple implant placement. Hands-on implant placement in artificial mandibles.

302 Teamwork for a successful implant office (2 day)

Sterile technique for implantology: protocol and documentation for treatment planning and proper patient consent, surgical template construction.

302 will allow time to do proper Diagnosis and Treatment Planning with dental implants, construction of proper useful surgical stents by Doctor/staff, Doctor/staff use of sterile technique to get predictable results, Hands-on implant placement in artificial mandibles utilizing staff to help the doctor place the implants correctly, Incorporating proper suturing techniques for better tissue closure, How to talk to patients about the benefits of dental implants, Oral hygiene responsibility of patient and staff members, MII Protocol of preparing Doctor/staff/ their patient with dental implant treatment at MII facility

303 Keeping Endo Implants Simple

Version of 301 for Endodontists. with content specific to Endodontists.

305 Implant Prosthetics. (2 days)

Even if you don't do surgery, learn how to restore so you keep your patient in your practice. Teaches the different basic concepts and the types of prosthetics components from different implant systems.

551 Extern program part 1

Preparing your patient selections and assisting with placing implants in your own patients. (Approximately 20-30 hrs CE)

Requirements:- Maxillary anterior/posterior using bone spreading techniques, Mandibular anterior/posterior using rotary instrumentation– Appointment times arranged on a Wednesday or Friday.

552 Extern program part 2

The same as 551 but Doctor/staff perform surgery under supervision and guidance.

Advanced courses.

601 Bone grafting made simple. (2 day)

How and when to graft (and when not to). Types of graft materials, use of PRP and other adjuncts. Bring your own patients for hands on surgery. Sinus grafting, block bone grafts, on-lay bone grafting procedures.

Midwest Implant Institute is an ADA
recognized continuing education provider.

For further information and to register go to;
www.midwestimplantinstitute.org

MII Extern course requirements and fees

Unless otherwise stated, all courses commence at 8am and finish at 5pm

301 should be taken first, then 302 or 302 can be taken before 301. For Endodontists 303 is a special course to see if they want to pursue implant training.

Courses 551 and 552 run throughout the year with dates and times arranged for mutual convenience of all involved. It usually takes 9-18 months to complete the MII Externship curriculum for doctors and staff., but can be completed much quicker if your patients are available.

The 2009 calendar is:

February	6/7th	MIIFellows Annual Symposium
March	6/7th	301 How to do the simple procedures of implant placement and restoration.
	20/21st	601-Bone grafting and sinus elevation.
	28th	303 Keeping Endo Implants Simple.
April	3/4th	302 Teamwork for a Successful Implant Office.
	17/18th	301 How to do the simple procedures of implant placement and restoration.
May	8/9th	301 How to do the simple procedures of implant placement and restoration.
	29/30th	302 Teamwork for a Successful Implant Office.
June	12/13th	302 Teamwork for a Successful Implant Office.
September	11th	303 Keeping Endo Implants Simple.
	18/19th	301 How to do the simple procedures of implant placement and restoration.
October	2/3rd	301 How to do the simple procedures of implant placement and restoration.
	8/9th	601-Bone grafting and sinus elevation.
	16/17th	301 How to do the simple procedures of implant placement and restoration.
	21/22nd	302 Teamwork for a Successful Implant Office.
	29/30th	305-Bone grafting and sinus elevation.
November	4/5th	302 Teamwork for a Successful Implant Office.
December	2/3rd	302 Teamwork for a Successful Implant Office.

Tuition	
301	Docs \$1250 Assts \$250
302	Docs \$1250 Assts \$250
303	Docs \$950 Assts \$175
305	Docs \$1250 Assts \$250
551/552	\$12,550 (includes assistants) (can also be paid as 4 monthly payments of \$3250 or 6 monthly payments of \$2200). External finance op- portunities available.
601	Docs \$2600 Assts \$250 MII Fellows and repeat participants \$1500

Teaching Faculty:

Director of Surgery
Alfred "Duke" Heller DDS, MS
Director of Prosthetics
Rob Heller DDS
Director Staff Teaching
Vickie McCune

Russell Kiser DDS, MS
Kim Laurel DDS, MS

Presenters for different implant systems
Guest Speakers and Fellows of the
Midwest Implant Institute.

Dr. Alfred "Duke" Heller is the founder of MII. He limits his practice to the placement of dental implants. He has placed more than 20,000 implants since 1969. He received both his DDS (1962) and MS (1974) from Ohio State University. He is a fellow of the American Academy of Implant Dentistry and Midwest Implant Institute, which he founded in 1980. Dr. Heller is Board Certified in Oral Implantology and is past president of the ABOI. He is also on the staff at Grady Memorial Hospital. He has probably done more one-on-one dental implant education than anyone else in USA.

Dr. Robert Heller is a graduate of Ohio Wesleyan University and the Ohio State University College of Dentistry (1988). He completed a Prosthetic residency at Medical College of Virginia (1990) and a hospital based implant residency at Loma Linda University Dental School (1997) He served as President of the Ohio Section of the American College of Prosthodontics and Chairman for the Ohio Dental Association's Subcouncil on Young dentists. Dr. "Rob" is a teaching faculty member of the MII since 1995, and director of the prosthetic arm of MII.

Vickie McCune started in dentistry in 1978, as a dental assistant. She has been teaching, her true love, for 15 years. Anyone who has taken her courses remembers with fun and laughter how to do 'Sterile Protocol Technique' and 'Surgical Assisting' for Implant Dentistry. She has been with Dr. Heller and traveled/ lectured with MII for 15 years.

Dr. Kim Laurel is a 1976 graduate of the Ohio State University College of Dentistry and received a Master of Science in Prosthodontics from the same institution in 1986. He was a full-time faculty member at OSU for 20 years and coordinated the fixed prosthodontic portion of the Advanced Prosthodontic Residency Program. He maintains a Prosthodontic private practice geared toward aesthetic dentistry, full mouth rehabilitation using fixed, removable and implant prosthodontics and the treatment of Temporomandibular disorders. He has authored over 30 research publications in dental and medical journals in the areas of Magnetic Resonance Imaging of the TMJ, occlusion, air-abrasion, dental lasers and post and cores technology. He has given numerous continuing education seminars and international presentations on a variety of topics.

Dr. Russell Kiser is a graduate of The Ohio State University College of Dentistry (1999, DDS). Subsequently, training at a general practice residency (GPR) at St. Luke's/St. Vincent's Charity Hospital in Cleveland, Ohio was completed (2000). Then, specialty training in Endodontics and a masters thesis was completed at The Ohio State University (2002, MS). Since then he completed implant training at The Midwest Implant Institute in Columbus, Ohio (2006). Currently, he maintains a private practice and is on faculty at The Midwest Implant Institute.

Administrative Director;

Carol Logan, 4891 H Middletowne St. Columbus, OH 43214
